

| Test case id | Functionality id | Testcase Name | Testcase summary | pre condition | steps | Testdata | Expected result | Actual result | Status | |
|-------------------|------------------|--------------------------------------|--|--|--|---|---|---|--------|--|
| 1 | 101 | Check website Link | After open website check it's open properly or not | internet, browser&website in working condition | 1.open browser(google chrome)2.enter link | saucedemo.com | website should be open properly | As per expected result | pass | |
| 2 | 101 | Check website Link | After open website check it's open properly or not | internet, browser&website in working condition | 1.open browser(microsoft edge)2.enter link | saucedemo.com | website should be open properly | website is not opening, this site can't be accessed | fail | |
| 3 | 101 | Check website Link | After open website check it's open properly or not | internet, browser&website in working condition | 1.open browser app in mobile phone (google chrome)2. enter link | saucedemo.com | website should be open properly | As per expected result | pass | |
| Login page | | | | | | | | | | |
| 4 | 102 | Check Login Form UI | After open website check login form ui is displayed properly or not | internet, browser&website in working condition | 1.open browser(google chrome)2.enter link3.navigate to login page | http://saucedemo.com/ | Login page should be displayed properly with username, password& login button | As per expected result | pass | |
| 5 | 103 | Check Username field (standard user) | After open login page check username field accepts standard user or not | internet, browser&website in working condition | 1.open browser(google chrome)2.enter link3.navigate to login page | standard_user | username should be entered successfully in username field | As per expected result | pass | |
| 6 | 104 | Check password field (standard user) | After open login page check password field accepts standard user or not | internet, browser&website in working condition | 1.open browser(google chrome)2.enter link3.navigate to login page | secret_sauce | password should be entered successfully in password field | As per expected result | pass | |
| 7 | 105 | Check valid login(standard user) | after entering valid username & password check user is able to login successfully or not | internet, browser&website in working condition | 1.open browser google chrome)2.enter link3.go to login page 4.enter valid username5.enter valid password6.click on login button | username: standard_user password: secret_sauce | user should login successfully & dashboard/home page should be displayed | As per expected result | pass | |
| 8 | 106 | Check invalid login (standard user) | After entering invalid username & password, check error message is displayed or not | internet, browser&website in working condition | 1.open browser google chrome)2.enter link3.go to login page 4.enter invalid username5.enter invalid password6.click on login button | username: standard_user123 password: secret_sauce | user should not be logged in & error message should be displayed | As per expected result | pass | |

| | | | | | | | | | | |
|----|-----|---|---|--|---|---|--|------------------------|------|--|
| 9 | 107 | Check Empty login (standard user) | without entering username&password,click on login button and check validation message | internet, browser&website in working condition | 1.open browser google chrome)2.enter link3.go to login page 4.do not enter username&password5.click on login button | username:(blank) password:(blank) | user should not be logged in & required validation message should be displayed | As per expected result | pass | |
| 10 | 108 | Check username field (lockedoutuser) | After open login page check username field accepts locked out user or not | internet, browser&website in working condition | 1.open browser google chrome)2.enter link3.go to login page 4.enter locked out username | locked_out_user | username should be entered successfully in username field | As per expected result | pass | |
| 11 | 109 | Check password field (lockedoutuser) | After open login page check password field accepts locked out user password or not | internet, browser&website in working condition | 1.open browser google chrome)2.enter link3.go to login page 4.enter locked out password | secret_sauce | password should be entered successfully in password field | As per expected result | pass | |
| 12 | 110 | Check valid login (lockedoutuser) | After entering lockedout validusername&password check user is able to login or not | internet, browser&website in working condition | 1.open browser google chrome)2.enter link3.go to login page 4.enter locked out username5.enter valid password6.click on login button | username: locked_out_user password: secret_sauce | user should not be logged in & locked out error message should be displayed | As per expected result | pass | |
| 13 | 111 | Check invalid login (lockedoutuseruser) | After entering lockedout invalidusername&password check user is able to login or not | internet, browser&website in working condition | 1.open browser google chrome)2.enter link3.go to login page 4.enter locked out username5.enter invalid password6.click on login button | locked_out_user/wrong_password | proper error message should be displayed | As per expected result | pass | |
| 14 | 112 | Check empty login (lockedoutuser) | After leaving username & password blank check validation message is displayed or not | internet, browser&website in working condition | 1.open browser google chrome)2.enter link3.leave username & password blank4.click on login button | blank | validation message should be displayed | As per expected result | pass | |
| 15 | 113 | Check Locked out user | verify locked out user is not able to login into the application | internet, browser&website in working condition | 1.open browser2.enter saucedemo.com link 3.enter locked_out_user credentials4.click login | locked_out_user/problem_user | user should not be logged in | As per expected result | fail | |
| 16 | 114 | Check username field (problem user) | After open website check username field is working properly for problem user | internet, browser&website in working condition | 1.open browser2.enter saucedemo.com link 3.problem_user in username field | problem_user | username should accept input correctly | As per expected result | pass | |

| | | | | | | | | | | |
|----|-----|--|---|--|--|-----------------------------|---|------------------------|------|--|
| | | | | | | | | | | |
| 17 | 115 | Check password field (problem user) | After open website check password field is working properly for problem user | internet, browser&website in working condition | 1.open browser2.enter saucedemo.com link 3.enter password in password field | secret_sauce | password should be entered in masked formate | As per expected result | pass | |
| 18 | 116 | Check login button (problemuser) | After entering valid data check login button is working properly for problem user | internet, browser&website in working condition | 1.open browser2.enter valid username&password3.click on login button | problem_user/secret_sauce | login button should work properly | As per expected result | pass | |
| 19 | 117 | Check valid login (problemuser) | After entering valid problem user credentials check user is able to login or not | internet, browser&website in working condition | 1.open browser2.enter valid username&password3.click on login button | problem_user/secret_sauce | user should be logged in successfully but ui issues may be observed | As per expected result | pass | |
| 20 | 118 | Check invalid login (problemuser) | After entering invalid problem user username & password check error message is displayed or not | internet, browser&website in working condition | 1.open browser 2.enter saucedemo.com 3.enter problem_user 4.enter wrong password 5.click login | problem_user / wrong_pass | 1.open browser2. enter saucedemo.com link 3. problem_user in username field | As per expected result | pass | |
| 21 | 119 | Check empty login (problemuser) | After leaving username & password blank check validation message is displayed or not | internet, browser&website in working condition | 1.open browser 2.enter saucedemo.com 3.leave fields blank 4.click login | blank | validation message should be displayed | As per expected result | pass | |
| 22 | 120 | Check problem user | Verify problem user is able to login but application behaves incorrectly | internet, browser&website in working condition | 1.open browser 2.enter saucedemo.com 3.enter problem user credentials 4. click login | problem_user / secret_sauce | user should login with UI/data issues | As per expected result | pass | |
| 23 | 121 | Check username field (performanceglitchuser) | After open website check username field works properly for performanceglitch user | internet, browser&website in working condition | 1.open browser 2.enter saucedemo.com 3.enter performance_glitch_user in username | performance_glitch_user | username should accept input properly | As per expected result | pass | |
| 24 | 122 | Check password field (performanceglitchuser) | After open website check password field works properly for performanceglitch user | internet, browser&website in working condition | 1.open browser 2.enter password in password field | secret_sauce | password should be entered in masked formate | As per expected result | pass | |

| | | | | | | | | | | |
|----|-----|---|--|--|--|--|--|------------------------|------|--|
| | | | | | | | | | | |
| 25 | 123 | Check login button (performanceglitchuser) | After entering valid data check login button works properly for performanceglitch user | internet, browser&website in working condition | 1.open browser 2.enter valid credentials 3.click login | performance_glitch_user / secret_sauce | login button should work with delay | As per expected result | pass | |
| 26 | 124 | Check valid login (performanceglitchuser) | After entering valid credentials check user login takes more time or not | internet, browser&website in working condition | 1.open browser 2.enter valid username & password 3.click login | performance_glitch_user / secret_sauce | login should be successful with delay | As per expected result | pass | |
| 27 | 125 | Check invalid login (performanceglitchuser) | After entering invalid credentials check error message is displayed or not | internet, browser&website in working condition | 1.open browser 2.enter wrong credentials 3.click login | performance_glitch_user / wrong_pass | error message should be displayed | As per expected result | pass | |
| 28 | 126 | Check empty login (performanceglitchuser) | After leaving username & password blank check validation message is displayed or not | internet, browser&website in working condition | 1.open browser 2.leave blank 3.click login | blank | validation message should be displayed | As per expected result | pass | |
| 29 | 127 | Check username field (erroruser) | After open website check username field works for error user | internet, browser&website in working condition | 1.open browser 2.enter saucedemo.com 3.enter error_user | error_user | username should accept input | As per expected result | pass | |
| 30 | 128 | Check password field (erroruser) | After open website check password field is working properly for error user | internet, browser&website in working condition | 1.open browser 2.enter saucedemo.com 3.enter password in password field | secret_sauce | password should be entered in masked formate | As per expected result | pass | |
| 31 | 129 | Check login button (erroruser) | After entering valid data check login button is working properly for error user | internet, browser&website in working condition | 1.open browser 2.enter valid username & password 3.click on login button | error_user / secret_sauce | login button should work properly | As per expected result | pass | |
| 32 | 130 | Check valid login (erroruser) | After entering valid error user credentials check user is able to login or not | internet, browser&website in working condition | 1.open browser 2.enter valid username & password 3.click login | error_user / secret_sauce | user should be logged in but errors may occur in cart/checkout | As per expected result | pass | |

| | | | | | | | | | |
|----|-----|-----------------------------------|--|--|--|----------------------------|--|------------------------|------|
| 33 | 131 | Check invalid login (erroruser) | After entering invalid credentials check error message is displayed for error user | internet, browser&website in working condition | 1.open browser 2.enter invalid credentials 3.click login | error_user / wrong_pass | error message should be displayed | As per expected result | pass |
| 34 | 132 | Check empty login (visualuser) | After leaving username & password blank check validation message for visual user | internet, browser&website in working condition | 1.open browser 2.leave username & password blank 3.click login | blank | validation message should be displayed | As per expected result | pass |
| 35 | 133 | Check username field (visualuser) | After open website check username field is working properly for visual user | internet, browser&website in working condition | 1.open browser 2.enter saucedemo.com 3.enter visual_user in username field | visual_user | username should accept input properly | As per expected result | pass |
| 36 | 134 | Check password field (visualuser) | After open website check password field is working properly for visual user | internet, browser&website in working condition | 1.open browser 2.enter password in password field | secret_sauce | password should be entered in masked formate | As per expected result | pass |
| 37 | 135 | Check login button (visualuser) | After entering valid data check login button is working properly for visual use | internet, browser&website in working condition | 1.open browser 2.enter valid credentials 3.click on login button | visual_user / secret_sauce | login button should work properly | As per expected result | pass |
| 38 | 136 | Check valid login (visualuser) | After entering valid visual user credentials check UI misalignment after login | internet, browser&website in working condition | 1.open browser 2.enter valid credentials 3.click login | visual_user / secret_sauce | user should login with UI visual defects | As per expected result | pass |
| 39 | 137 | Check invalid login (visualuser) | After entering invalid credentials check error message for visual use | internet, browser&website in working condition | 1.open browser 2.enter invalid credentials 3.click login | visual_user / wrong_pass | error message should be displayed | As per expected result | pass |
| 40 | 138 | Check empty login (visualuser) | After leaving username & password blank check validation message for visual user | internet, browser&website in working condition | 1.open browser 2.leave fields blank 3.click login | blank | validation message should be displayed | As per expected result | pass |

| | | | | | | | | | | |
|----|-----|---|---|--|---|--------------------------------|---|------------------------|------|--|
| 41 | 139 | Check invalid login (lockedoutuseruser) | After entering invalid credentials check error message for lockedout user | internet, browser&website in working condition | 1.open browser 2.enter locked_out_user 3.enter wrong password 4.click login | locked_out_user / wrong_pass | proper locked out error message should be displayed | As per expected result | pass | |
| 42 | 140 | Check empty login (lockedoutuser) | After leaving username & password blank check validation message for lockedout user | internet, browser&website in working condition | 1.open browser 2.leave fields blank 3.click login | blank | validation message should be displayed | As per expected result | pass | |
| 43 | 141 | Check Locked out user | After entering locked out user valid credentials check user is able to login or not | internet, browser & website in working condition | 1.open browser 2.enter saucedemo.com 3.enter locked_out_user 4.enter password 5.click login | locked_out_user / secret_sauce | user should not be logged in and locked out message should be displayed | As per expected result | pass | |
| 44 | 142 | Check username field (problem user) | After open website check username field is working properly for problem user | internet, browser & website in working condition | 1.open browser 2.enter saucedemo.com 3.enter problem_user in username field | problem_user | username should accept input properly | As per expected result | pass | |
| 45 | 143 | Check password field (problem user) | After open website check password field is working properly for problem user | internet, browser & website in working condition | 1.open browser 2.enter password in password field | secret_sauce | password should be entered in masked formate | As per expected result | pass | |
| 46 | 144 | Check login button (problemuser) | After entering valid data check login button is working properly for problem user | internet, browser & website in working condition | 1.open browser 2.enter valid username & password 3.click login button | problem_user / secret_sauce | login button should work properly | As per expected result | pass | |
| 47 | 145 | Check valid login (problemuser) | After entering valid problem user credentials check user is able to login or not | internet, browser & website in working condition | 1.open browser 2.enter valid username & password 3.click login | problem_user / secret_sauce | user should login but application issues may be observed | As per expected result | pass | |
| 48 | 146 | Check invalid login (problemuser) | After entering invalid problem user credentials check error message | internet, browser & website in working condition | 1.open browser 2.enter wrong credentials 3.click login | problem_user / wrong_pass | error message should be displayed | As per expected result | pass | |

| | | | | | | | | | | |
|----|-----|--|---|--|--|--|--|------------------------|------|--|
| 49 | 147 | Check empty login (problemuser) | After leaving username & password blank check validation message | internet, browser & website in working condition | 1.open browser 2.leave fields blank 3.click login | blank | validation message should be displayed | As per expected result | pass | |
| 50 | 148 | Check problem user | Verify problem user is able to login but application behaves incorrectly | internet, browser & website in working condition | 1.open browser 2.enter saucedemo.com 3.enter problem_user 4.enter password 5.click login | problem_user / secret_sauce | user should login with UI/data issues | As per expected result | pass | |
| 51 | 149 | Check username field (performanceglitchuser) | After open website check username field is working properly for performanceglitch user | internet, browser & website in working condition | 1.open browser 2.enter saucedemo.com 3.enter performance_glitch_user | performance_glitch_user | username should accept input properly | As per expected result | pass | |
| 52 | 150 | Check password field (performanceglitchuser) | After open website check password field is working properly for performanceglitch user | internet, browser & website in working condition | 1.open browser 2.enter password in password field | secret_sauce | password should be entered in masked formate | As per expected result | pass | |
| 53 | 151 | Check login button (performanceglitchuser) | After entering valid data check login button is working properly for performanceglitch user | internet, browser & website in working condition | 1.open browser 2.enter valid username & password 3.click login | performance_glitch_user / secret_sauce | login button should work with delay | As per expected result | pass | |
| 54 | 152 | Check valid login (performanceglitchuser) | After entering valid credentials check user login takes more time or not | internet, browser & website in working condition | 1.open browser 2.enter valid username & password 3.click login | performance_glitch_user / secret_sauce | user should login successfully with delay | As per expected result | pass | |
| 55 | 153 | Check invalid login (performanceglitchuser) | After entering invalid credentials check error message | internet, browser & website in working condition | 1.open browser 2.enter saucedemo.com 3.enter wrong username/password 4.click login | performance_glitch_user / wrong_pass | error message should be displayed | As per expected result | pass | |
| 56 | 154 | Check empty login (performanceglitchuser) | After leaving username & password blank check validation | internet, browser & website in working condition | 1.open browser 2.leave username blank 3.leave password blank 4.click login | blank | validation message should be displayed | As per expected result | pass | |

| | | | | | | | | | | |
|----|-----|-----------------------------------|--|--|--|----------------------------|--|------------------------|------|--|
| | | | | | | | | | | |
| 57 | 155 | Check username field (erroruser) | After open website check username field is working for error user | internet, browser & website in working condition | 1.open browser 2.enter saucedemo.com 3.enter error_user | error_user | username should accept input properly | As per expected result | pass | |
| 58 | 156 | Check password field (erroruser) | After open website check password field is working for error user | internet, browser & website in working condition | 1.open browser 2.enter password in password field | secret_sauce | password should be entered in masked formate | As per expected result | pass | |
| 59 | 157 | Check login button (erroruser) | After entering valid data check login button is working for error user | internet, browser & website in working condition | 1.open browser 2.enter valid credentials 3.click login | error_user / secret_sauce | login button should work properly | As per expected result | pass | |
| 60 | 158 | Check valid login (erroruser) | After entering valid credentials check user is able to login or not | internet, browser & website in working condition | 1.open browser 2.enter valid username & password 3.click login | error_user / secret_sauce | user should login successfully | As per expected result | pass | |
| 61 | 159 | Check invalid login (erroruser) | After entering invalid credentials check error message | internet, browser & website in working condition | 1.open browser 2.enter wrong credentials 3.click login | error_user / wrong_pass | error message should be displayed | As per expected result | pass | |
| 62 | 160 | Check empty login (visualuser) | After leaving username & password blank check validation | internet, browser & website in working condition | 1.open browser 2.leave fields blank 3.click login | blank | validation message should be displayed | As per expected result | pass | |
| 63 | 161 | Check username field (visualuser) | After open website check username field is working for visual user | internet, browser & website in working condition | 1.open browser 2.enter saucedemo.com 3.enter visual_user | visual_user | username should accept input properly | As per expected result | pass | |
| 64 | 162 | Check password field (visualuser) | After open website check password field is working for visual user | internet, browser & website in working condition | 1.open browser 2.enter password | secret_sauce | password should be entered in masked formate | As per expected result | pass | |
| 65 | 163 | Check login button (visualuser) | After entering valid data check login button works properly for performanceglitch user | internet, browser & website in working condition | 1.open browser 2.enter valid credentials 3.click login | visual_user / secret_sauce | login button should work properly | As per expected result | pass | |

| | | | | | | | | | | |
|----|-----|---|--|--|---|--------------------------------|--|------------------------|------|--|
| | | | | | | | | | | |
| 66 | 164 | Check valid login (visualuser) | After entering valid visual user credentials check user is able to login | internet, browser & website in working condition | 1.open browser 2.enter valid username & password 3.click login | visual_user / secret_sauce | user should login successfully with visual defects | As per expected result | pass | |
| 67 | 165 | Check invalid login (visualuser) | Verify invalid login shows error message | internet, browser & website in working condition | 1.open browser 2.enter saucedemo.com 3.enter visual_user 4.enter wrong password 5.click login | visual_user / wrong_pass | proper error message must display | As per expected result | pass | |
| 68 | 166 | Check empty login (visualuser) | Validate blank username & password | internet, browser & website in working condition | 1.open browser 2.leave both fields blank 3.click login | Blank | validation message must display | As per expected result | pass | |
| 69 | 167 | Check invalid login (lockedoutuseruser) | Verify invalid password shows error for locked user | internet, browser & website in working condition | 1.open browser 2.enter locked_out_user 3.enter wrong password 4.click login | locked_out_user / wrong_pass | locked out error must appear | As per expected result | pass | |
| 70 | 168 | Check empty login (lockedoutuser) | Validate blank username & password | internet, browser & website in working condition | 1.open browser 2.leave fields blank 3.click login | Blank | validation message must display | As per expected result | pass | |
| 71 | 169 | Check Locked out user | Verify locked_out_user cannot login | internet, browser & website in working condition | 1.enter locked_out_user 2. enter password 3.click login | locked_out_user / secret_sauce | locked-out error should appear | As per expected result | pass | |
| 72 | 170 | Check username field (problem user) | Verify problem_user username field accepts input | internet, browser & website in working condition | 1.open browser 2.enter problem_user | problem_user | username should accept text | As per expected result | pass | |
| 73 | 171 | Check password field (problem user) | Check password input masking | internet, browser & website in working condition | 1.enter password | secret_sauce | must show masked characters | As per expected result | pass | |
| 74 | 172 | Check login button (problemuser) | Verify login button click works | internet, browser & website in working condition | 1.enter creds 2.click login | problem_user / secret_sauce | must attempt login | As per expected result | pass | |
| 75 | 173 | Check valid login (problemuser) | verify successful login with UI issues | internet, browser & website in working condition | 1.enter valid creds 2.click login | problem_user / secret_sauce | login succeeds with UI issues | As per expected result | pass | |

| | | | | | | | | | | |
|----|-----|--|---|--|--|---|---|--|------|--|
| | | | | | | | | | | |
| 76 | 174 | Check invalid login (problemuser) | Verify invalid login shows error message | internet, browser & website in working condition | 1.enter invalid creds 2.click login | problem_user /12345 | problem error must appear | As per expected result | pass | |
| 77 | 175 | Check empty login (problemuser) | Validate blank username & password | internet, browser & website in working condition | 1.open browser 2.leave both fields blank 3.click login | Blank | validation message must display | As per expected result | pass | |
| 78 | 176 | Check problem user | Verify problem user is able to login but application behaves incorrectly | internet, browser & website in working condition | 1.open browser2.enter saucedemo.com3.enter problem user credentials4. click login | problem_user/secr et_sauce | user should login with UI/data issues | As per expected result | pass | |
| 79 | 177 | Check username field (performanceglitchuser) | verify username field accepts input properly for performance glitch user | internet, browser & website in working condition | 1.open browser2.enter saucedemo.com3.click on username field 4.enter performance_glitch_user | performance_glitic hes_user | username should be entered smoothly without delay | As per expected result | pass | |
| 80 | 178 | Check password field (performanceglitchuser) | check masked password | internet, browser & website in working condition | 1.enter password | secret_sauce | masked characters | As per expected result | pass | |
| 81 | 179 | Check login button (performanceglitchuser) | After entering valid data check login button is working properly for performanceglitch user | internet, browser & website in working condition | 1.open browser 2.enter valid username & password 3.click login | performance_glitic h_use password: secret_sauce | login button should work with delay | As per expected result | pass | |
| 82 | 180 | Check valid login (performanceglitchuser) | After entering valid performance_glitch_user user credentials check user is able to login | internet, browser & website in working condition | 1.open browser 2.enter valid username & password 3.click login | performance_glitic h_use password: secret_sauce | user should login successfully | login successful but very slow load time before inventory page appears | fail | |
| 83 | 181 | Check invalid login (performanceglitchuser) | Verify invalid login shows error message | internet, browser & website in working condition | 1.open browser 2.enter invalid username & password 3.click login | performance_glitic h_user password: 12345678 | performanceglitch user error must appear | As per expected result | pass | |
| 84 | 182 | Check empty login (performanceglitchuser) | Validate blank username & password | internet, browser & website in working condition | 1.open browser 2.leave both fields blank 3.click login | Blank | validation message must display | As per expected result | pass | |

| | | | | | | | | | | |
|----|-----|-----------------------------------|--|--|--|---|--|--|------|--|
| | | | | | | | | | | |
| 85 | 183 | Check username field (erroruser) | After open website check username field is working for error user | internet, browser & website in working condition | 1.open browser 2.enter saucedemo.com 3.enter erroruser | erouser | username should accept input properly | As per expected result | pass | |
| 86 | 184 | Check password field (erroruser) | Check password input masking | internet, browser & website in working condition | 1.open browser 2.enter password | secret_sauce | password should be entered in masked formate | As per expected result | pass | |
| 87 | 185 | Check login button (erroruser) | After entering valid data check login button is working properly for error user | internet, browser & website in working condition | 1.open browser 2.enter valid username & password 3.click login | error_user secret_sauce | login button should work with delay | As per expected result | pass | |
| 88 | 186 | Check valid login (erroruser) | After entering valid error_user user credentials check user is able to login | internet, browser & website in working condition | 1.open browser 2.enter valid username & password 3.click login | performance_glitch_use_password: secret_sauce | user should login successfully | erroruser password is secret_sauce login works but checkout process broken/errors appear in cart | fail | |
| 89 | 187 | Check invalid login (erroruser) | Verify invalid login shows error message | internet, browser & website in working condition | 1.open browser 2.enter invalid username & password 3.click login | error_user password: 123456789 | performanceglitch user error must appear | As per expected result | pass | |
| 90 | 188 | Check empty login (visualuser) | Validate blank username & password | internet, browser & website in working condition | 1.open browser 2.leave both fields blank 3.click login | Blank | validation message must display | As per expected result | pass | |
| 91 | 189 | Check username field (visualuser) | After open website check username field is working for visual user | internet, browser & website in working condition | 1.open browser 2.enter saucedemo.com 3.enter visual user | erouser | username should accept input properly | As per expected result | pass | |
